

Product Specification Summary

Infectious Diseases

Catalog Number	60-2004-10
Product Name	Mycobacterium tuberculosis Genemer TM , 10 nmols
Size	10 nmols
Description	MTB Primer P7F/P7R
Component/Note	10 nmol primer pair

Optimized primer pair for PCR amplification of HBV specific DNA fragment. Specialized amplification conditions may be required for certain amplifications. Amplification of target fragment DNA requires optimization using varying amounts of the template based on its abundance. Generally less than 10 ng of template is sufficient for a successful amplification. It is a good strategy initially to amplify multiple amounts for optimization. Use known positive control DNA as one sample. The product contains 10 nmols lyophilized GenemerTM pair. The quantity supplied is sufficient for 800 regular 25 ul PCR reaction. Common pathogen GenemerTM are available. Please refer to our web site for a complete listing.
