

Product Specifications

Custom Oligo Synthesis, antisense oligos, RNA oligos, chimeric oligos, Fluorescent dyes, Affinity Ligands, Spacers & Linkers, Duplex Stabilizers, Minor bases, labeled oligos, Molecular Beacons, siRNA, phosphonates
Locked Nucleic Acids (LNA); 2'-5' linked Oligos

Oligo Modifications

For research use only. Not for use in diagnostic procedures for clinical purposes.

Biotin TEG

Category	Affinity Ligands
Modification Code	Bio-TEG
Reference Catalog Number	26-6407
5 Prime	Y
3 Prime	Y
Internal	Y
Molecular Weight(mw)	569.61

Biotin-TEG is a biotin attached to a 15-atom mixed polarity triethylene glycol spacer, and can be incorporated at either the 5'- or 3'-end of an oligonucleotide, or at an internal position. The spacer acts to minimize steric hindrance between the biotin moiety and the oligo, thereby providing streptavidin easy access to the biotin for capture and immobilization of the oligo. Additional technical details for biotin are presented in the Biotin technical sheet. Biotin TEG
