

Product Specification Summary

GeneAssays™

| | |
|----------------|---|
| Catalog Number | 26-6102-25 |
| Product Name | Custom SPCT (Synthetic Positive Control Template); 181-250mer; 250 pmol |
| Size | 250 pmol |
| Description | Custom SPCT (Synthetic Positive Control Template); 181-250mer; 250 pmol |

Custom SPCT (Synthetic Positive Control Template)

Establish and Substantiate Positive Controls for Your Research

Gene Link provides Synthetic Positive Control Templates (SPCT) as an alternate to wild type DNA that usually is difficult to source out for different alleles. These SPCT can be used as positive control templates for all genotyping assays in addition to DME TaqMan® Assays.

Gene Link specializes in long oligo synthesis up to 250mer in length. Longer templates can be constructed by ligation. Gene Link can provide custom synthetic oligo templates for all your genotyping and template requirements. We routinely provide expert technical assistance in the design of templates and ultra modified fluorescent probes with enhanced duplex stability and nuclease resistance. Gene Link can provide custom synthetic oligo templates for all your genotyping and template requirements.
