Product Specification Summary

Huntington Disease

Catalog Number	40-2025-06
Product Name	Huntington Disease 116 CAG Genemer Control DNA; 500 ng
Size	500 ng
Description	GLHD Genemer
Component/Note	GLHD ~116 CAG repeats
Component/Note	Huntington Disease

A tube containing 500 ng of lyophilized control DNA segment. The control DNA's contains varying triple repeats. These are specific DNA templates for Gene Link's Genemer and PCRProber products. The above control DNA is an ideal genotyping template for optimizing and performing control amplification with unknown DNA. The size of the triple repeats has been determined by sequencing and gel electrophoresis. The stability of size repeats upon cloning and amplification has NOT been determined. Thus, the size should be considered approximate and there is no claim for each fragment to contain the exact number of triple repeats. The quantity supplied is sufficient for 1000 regular 50ul PCR reaction.
