

## Product Specification Summary

### Omni-Pure™ Genomic DNA Purification Systems

Catalog Number	40-5112-01
Product Name	Glycogen Solution 10 mg/ml; 1 mL
Size	1 mL
Description	Glycogen Solution 10 mg/ml; 1 mL
Component/Note	10 mg/mL
Storage	Store at -20°C

Effective DNA and RNA precipitation with the use of monovalent salts and ethanol or isopropanol is dependent on its concentration. DNA and specifically RNA precipitation at a concentration of less than 50 ng/mL is usually not quantitative and the pellet is not clearly visible leading to unreliable recovery.

Addition of glycogen or linear acrylamide as a carrier/coprecipitant aids in quantitative recovery and specifically clear visibility of the pellet. Glycogen does not interfere with spectrophotometric readings, electrophoresis, and most molecular biology enzymatic applications including PCR.

Usage: 1  $\mu$ L (10  $\mu$ g) of 10mg/mL glycogen solution is adequate for 500  $\mu$ L DNA or RNA solution.

Glycogen origin: Glycogen is a highly purified polysaccharide derived from oysters.

Specification: Molecular biology grade. Glycogen solution supplied is validated DNase and RNase free. Glycogen solution may contain remnant nucleic acids.
