PCR QuickLock™ Tubes & PCR Standard Tubes

All PCR tubes are pre-sterilized and are RNase, DNase and pyrogen free. PCR tubes are manufactured using virgin polypropylene and packaged under dust free conditions. QuickLock™ cap design for PCR tubes are easy to open and close but the QuickLock™ mechanism prevents from accidental opening, withstands boiling aqueous solutions and is leak proof during thermal cycling. Standard PCR tubes do not have the QuickLock™ cap mechanism. All PCR tubes are available in a selection of color for easy color coding when setting up numerous reactions.
