Product Specification Summary

Genemer™

Catalog Number	40-2026-10
Product Name	Myotonic Dystrophy Genemer (spanning triple repeat region); 10 nmols
Size	10 nmols
Description	CTG repeat region
Component/Note	Primer DM R1
Component/Note	Primer DM F1

Genemer™ are optimized primer pairs for amplification of the gene fragment of interest, particularly those spanning a mutation. A wide range is available from single base pair mutation sites, the complex triple repeat disorders and various pathogens. Genemer™ kits are complete, easy-to-use systems for reliable genotyping of large repeats in certain triple repeat disorder. The Genemer™ product contains 10 nmols of the primer pair that is sufficient for 400 regular 50 µl amplifications. The Genemer™ Kit contains reagents as well as control DNA sufficient for 100 amplifications.
