

Product Specification Summary

RT-PCRmer™

Catalog Number	40-1008-10
Product Name	GAPDH D Human RT-PCRmer™ (F1/R3) Exon 2-9; 10 nmols
Size	10 nmols
Description	GAPDH-D Primer Pair
Component/Note	Primer 2: GAPDH R3
Component/Note	Primer 1: GAPDH F1

RT-PCRmer™ are primer pairs for specific amplification of cDNA. Glyceraldehyde 3 phosphate dehydrogenase (G3PDH), like β -actin, is ubiquitously expressed and serves as a positive control for northern and other expression studies. These are generally used as controls for measuring cDNA synthesis efficiency by reverse transcription and as controls for mRNA (cDNA) quantitative expression studies. The enclosed human G3PDH RT-PCRmer™ are supplied as a lyophilized powder in aliquots of 10nmols. The 10 nmols of primer when dissolved in 500 μ l sterile water or TE will give a solution of 20 μ Molar i.e. 20 pmols/ μ l. The quantity supplied is sufficient for at least 400 regular 25 μ l PCR reaction* for ethidium bromide stained visualization. The amplified product may also be detected by hybridization using Gene Link OligoProber™ with either a free 5' OH (Catalog No. 40-1105-02) for 32P labeling or biotinylated probe (Catalog No. 40-1105-03) for non-radioactive detection.
